

ANTI-VORTEX PLATE ASSEMBLY

Fountain Supply Company
COMPONENT SUPPLY

DESCRIPTION:

In pool applications, it is often desirable to place an anti-vortex plate assembly over a sump in the floor of the pool to avoid water vortexing as it is drawn into the suction line. The assembly consists of cast bronze anti-vortex plate and cyclolac sump.

SPECIFICATIONS:

ANTI-VORTEX PLATE: Shall be cast bronze construction 8" in diameter. Natural finish.

SUMP: Shall be white cyclolac plastic.

FASTENERS: Shall be stainless steel or silicone bronze.

NOTE: 2" NPT pipe plug included.

MAX GPM: 100.

FINISH: Anti-vortex plate available chrome plated at additional charge — Add "CP" suffix.
