

Description

The **Float Valve Niche Water Level Controller** is an economical way to control the water level in a water feature. By utilizing a small float valve the overall size of the niche is one of the smallest in the industry. Also integrating an overflow drain connection helps reduce components in the basin wall

Part Number

- **FVNSS-50TT** 1/2" Inlet, 1-1/2" Drain

Additional sizes are available upon request

Specification

- **Water level:** Shall be 2 inches down from top of niche.
